

Two-Bath Smart / Mechanical Plumbing and Hall Tub

Hot and cold water feed the shared smart valve and each local Delta mixer. Checked mixed-water sources feed each bathroom through a common tee. The Peregrine is the Hall-bath tub selection.

Hot water Cold water Mixed water

Page 2 - Lowe's + Ferguson Cost Breakdown

Prices checked August 29, 2026. Priced items use Lowe's except the Moen controller from Ferguson Home and the selected RP77092SS tub spout from Delta because the Stainless version was not verified at Lowe's. Prices exclude tax, delivery, installation labor, piping, and electrical work.

Planning total with connection components	\$4,556.28	Installer takeoff excluded	Project-specific
Selected fixture package \$4,097.19 + provisional connection components \$459.09.		• Pipe lengths and additional adapters, couplings, elbows, supports, and transition fittings • Access panel size and quantity • GFCI receptacles/circuits, wiring, boxes, and permits • Tax, delivery, labor, testing, and finish-wall repair	

Important coordination: The RP77092SS is a non-diverter spout because the Hall R11000/T11864-SS controls the outlet. Delta lists 1/2-in copper-sweat or 1/2-in IPS installation and includes the RP12307 adapter. Have Delta and the plumber confirm the R11000 tub-filling arrangement, flow, straight-drop geometry, and service access before ordering.
